Andrew D. Bagdanov,
Associate Professor,
University of Florence

To whom it may concern:

This is a brief letter of recommendation for Yaxing Wang. Yaxing joined my research group at the Computer Vision Center, Barcelona, as a PhD student five years ago. Though I have since changed affiliations, I have maintained contact with Yaxing and have followed his outstanding career as a student in the LAMP group over these last years. In this brief note I attempt to lay out some of the reasons for this.

Yaxing is an intelligent, motivated, and very hard worker. Most of the early work that Yaxing did was related to coming up to speed with the latest techniques in deep learning, and to master the many (and at that time rapidly evolving) deep learning frameworks. He quickly showed himself to be an extremely fast learner and was able to grasp the latest state-of-the-art and to propose novel solutions based on current thought and lines of research in deep learning. He works very well in a team, demonstrating initiative, independence and leadership.

Yaxing has a very strong publication record in generative modeling and lifelong learning. I have no doubt that he is ready to assume responsibilities in an applied research and development position. His passion for academics and attention to details will benefit any team lucky enough to acquire him.

If you have any questions, please feel free to contact me.

Sincerely,
Andrew D. Bagdanov
