Letter in Support of Yaxing Wang,

My name is Fahad Shahbaz Khan. I have known Yaxing Wang for one year. Yaxing has completed Internship in my group at Inception Institute of Artificial Intelligence (IIAI). During his internship, Yaxing has demonstrated tremendous talent in coding, research and team cooperation. He expresses self-motivation when he joins our project. Yaxing has innovative ideas, team techniques and a gift for motivating his colleagues when working on a group project.

His project is about image-to-image translation, and the related work has been published at a top conference. I believe you would benefit greatly by accepting Yaxing into your group and department. He has proven himself to be a hard worker willing to take any role in a team no matter how larger or small. I believe he has a promising future in acadimitic.

To summarize, I would highly recommend Yaxing for his proposed position in Nanjing University of Science and Technology. If you have future questions, I can be contacted at fahad.khan@mbzuai.ac.ae.

Sincerely,

Fahad Shahbaz Khan
